| Subject:<br>GENERATION<br>TRANSMISSION<br>&<br>DISTRIBUTION | No. of<br>days per<br>week<br>class<br>allotted: 4 | Semester From Date : 16/01/2024 to Date: 26/04/2024<br><br>No. of Weeks: 15  |
| Week                                                        | Class Day                                          | Theory                                                                       |
| 1st                                                         |                                                    | <b>1. GENERATION OF ELECTRICITY</b>                                          |
|                                                             | 1st                                                | 1.1. Elementary idea on generation of electricity from Thermal Power station |
|                                                             | 2nd                                                | 1.2. Elementary idea on generation of electricity from Hydel Power station   |
|                                                             | 3rd                                                | 1.3. Elementary idea on generation of electricity from Nuclear Power station |
|                                                             | 4th                                                | 1.4. Introduction to Solar Power Plant (Photovoltaic cells)                  |
| 2nd                                                         | 1st                                                | 1.5. Layout diagram of thermal power station                                 |
|                                                             | 2nd                                                | 1.6. Layout diagram of hydel power station                                   |
|                                                             | 3rd                                                | 1.7. Layout diagram of nuclear power station                                 |
|                                                             |                                                    | <b>2. TRANSMISSION OF ELECTRIC POWER</b>                                     |
|                                                             | 4th                                                | 2.1. Layout of transmission and distribution scheme.                         |
| 3rd                                                         | 1st                                                | 2.2. Voltage Regulation of transmission.                                     |
|                                                             | 2nd                                                | 2.3. efficiency of transmission.                                             |
|                                                             | 3rd                                                | 2.4. Kelvin's law for economical size of conductor.                          |
|                                                             | 4th                                                | 2.5. Corona and corona loss on transmission lines.                           |
|                                                             |                                                    | <b>3. OVER HEAD LINES</b>                                                    |
| 4th                                                         | 1st                                                | 3.1. Types of supports, size and spacing of conductor.                       |
|                                                             | 2nd                                                | 3.2. Types of conductor materials.                                           |
|                                                             | 3rd                                                | 3.3. State types of insulator and cross arms.                                |
|                                                             | 4th                                                | 3.4. Sag in overhead line with support at same level                         |
| 5th                                                         | 1st                                                | 3.5. Sag in overhead line with support at different level.                   |
|                                                             | 2nd                                                | 3.6. approximate formula for effect of wind, ice and temperature on sag      |
|                                                             | 3rd                                                | 3.7. Simple problem on sag.                                                  |
|                                                             |                                                    | <b>4. PERFORMANCE OF SHORT &amp; MEDIUM LINES</b>                            |
|                                                             | 4th                                                | 4.1. introduction to short line                                              |
|                                                             |                                                    | 4.2. introduction to medium lines                                            |
| 6th                                                         | 1st                                                | 4.3. Calculation of regulation of short line                                 |
|                                                             | 2nd                                                | 4.4. Calculation of efficiency of short lines                                |

|      |     |                                                                                                       |
|------|-----|-------------------------------------------------------------------------------------------------------|
|      | 3rd | 4.5. Calculation of regulation of medium line                                                         |
| 7th  | 1st | 4.6. Calculation of efficiency of medium lines                                                        |
|      | 2nd | 4.7. simple problems on short and medium transmission lines                                           |
|      |     | <b>5. EHV TRANSMISSION</b>                                                                            |
|      | 3rd | 5.1. EHV AC transmission                                                                              |
|      | 4th | 5.2. <i>Reasons for adoption of EHV AC transmission.</i>                                              |
| 8th  | 1st | 5.3. Problems involved in EHV transmission.                                                           |
|      | 2nd | 5.4. HVDC transmission.                                                                               |
|      | 3rd | 5.5. Advantages of HVDC transmission system.                                                          |
|      | 4th | 5.6. Limitations of HVDC transmission system.                                                         |
| 9th  | 1st | 5.7. doubt clearing class                                                                             |
|      |     | <b>6. DISTRIBUTION SYSTEMS</b>                                                                        |
|      | 2nd | 6.1. Introduction to Distribution System                                                              |
|      | 3rd | 6.2. Connection Schemes of Distribution System: (Radial, Ring Main and Inter connected system)        |
|      | 4th | 6.3 DC distributions.<br>6.3.1 Distributor fed at one End.<br>6.3.2 Distributor fed at both the ends. |
| 10th | 1st | 6.4. Ring distributors.                                                                               |
|      | 2nd | 6.5. AC distribution system.                                                                          |
|      | 3rd | 6.6. Method of solving AC distribution problem.                                                       |
|      | 4th | 6.7. Three phase four wire star connected system arrangement.                                         |
|      |     | <b>7. UNDERGROUND CABLES</b>                                                                          |
| 11th | 1st | 7.1. <i>Cable insulation and classification of cables.</i>                                            |
|      | 2nd | 7.2. Types of L. T. & H.T. cables with constructional features                                        |
|      | 3rd | 7.3. Methods of cable laying                                                                          |
|      | 4th | 7.4 Localization of cable faults                                                                      |
| 12th | 1st | 7.5. Murray loop test for short circuit fault / Earth fault.                                          |
|      | 2nd | 7.6. Varley loop test for short circuit fault / Earth fault.                                          |
|      |     | <b>8. ECONOMIC ASPECTS</b>                                                                            |
|      | 3rd | 8.1 Causes of low power factor in power system                                                        |
|      | 4th | 8.2. methods of improvement of power factor in power system                                           |
| 13th | 1st | 8.3. Factors affecting the economics of generation                                                    |
|      | 2nd | 8.4. Load curves, Demand factor, Maximum demand                                                       |
|      | 3rd | 8.5. Load factor, Diversity factor, Plant capacity factor                                             |
|      | 4th | 8.6. Peak load and Base load on power station                                                         |
|      |     | <b>9. TYPES OF TARIFF</b>                                                                             |
| 14th | 1st | 9.1. <i>Desirable characteristic of a tariff.</i>                                                     |
|      | 2nd | 9.2. Explanation of flat rate, block rate, two part and maximum demand tariff.                        |
|      | 3rd | 9.3. simple problems on tariff                                                                        |

|      |     |                                                        |
|------|-----|--------------------------------------------------------|
|      |     | <b>10. SUBSTATION</b>                                  |
|      | 4th | 10.1. Layout of LT substation                          |
